## PROJECTS

---

### InC'24

- Developed an Event Management System for Pune Institute of Computer Technology's flagship event, integrating features such as event registration, email notifications, project allocation to judges, Marks entry and result calculation. ([www.pictinc.org](http://www.pictinc.org))

### Chatify - Chat App

- Developed a chat application using Next.js, Shadcn, and Convex, allowing users to seamlessly sign up, initiate conversations, and share texts, videos, and images. ([Github link](#))

### Mess Wala

- Developed an application addressing students' needs by displaying nearby messes and their daily menus based on the user's location.
- Implemented features allowing users to notify mess owners to update menus and enabling owners to update their daily menu. ([Play Store](#)).

## LEADERSHIP

---

- Technical Lead, PICT InC'24: Led a 10-member team in developing an application addressing diverse challenges in event management.
